

Mondéco Exotic at Henry Moore Institute, Leeds

The Project

New Art Gallery and Museum, attached to existing building. 400 square metres in total.

The Requirement

A neutral, non-reflective finish to fit in with the minimalist idea was required. Floor needed to complement the sculptures not distract the eye. Needed to be hard wearing enabling heavy sculptures to be exhibited. The floor needed to be easy to clean.

The Solution

A seamless epoxy terrazzo flooring system. High abrasion resistance and easy to clean. A special non reflective Mondéco Exotic was produced in dark grey.
